QA ENGINEER | PROJECT COORDINATOR

Detail-oriented Software Engineering graduate with over 3 years of combined professional and academic experience bridging software quality assurance and Agile project coordination. Proven track record in designing rigorous test cases, manual testing, and API verification using Postman and Jira. Adept at managing project lifecycles, leading cross-functional teams, and leveraging advanced AI tools to optimize sprint planning, documentation, and test execution.

CORE PROFICIENCIES & SKILLS

Quality Assurance: Manual Testing, API Testing (Postman), Test Case Design, Bug Reporting, Defect Tracking (Jira), Regression Testing, User Acceptance Testing (UAT), Agile/Scrum.

Project Coordination: Agile Project Management, Sprint Planning, Stakeholder Communication, Task Prioritization, Timeline Tracking, Risk Mitigation, Documentation (Confluence), Jira & Trello.

Technical & AI Tools: Claude, Cursor, Codex, Git, GitHub, Chrome DevTools, Figma, Firebase, MongoDB, RESTful Services.

Core Concepts: Software Engineering Methodologies, Information & Cyber Security, Systems Analysis, Data Entry & Validation, Performance Awareness.

PROFESSIONAL EXPERIENCE

DIVCODES- Beriut, Lebanon

March 2023-Now

QA Coordinator & Front-End Liaison

- Coordinated sprint planning and daily standups, maintaining Jira and Trello boards for 3 concurrent projects, which improved team delivery accuracy by 40%.
- Conducted end-to-end manual and API testing (Postman) for all new features, identifying and tracking 100+ critical bugs via Jira, reducing post-launch defects by 70%.
- Acted as the primary QA liaison between development and product teams, ensuring clear requirements traceability and that deliverables met strict quality gates before deployment.
- Spearheaded quality assurance workflows and sprint coordination for multiple high-impact web applications, including "Clinikal" (a multi-tenant EHR platform), ensuring compliance with strict requirements.
- Utilized AI tools (Claude) to accelerate the creation of comprehensive test cases, project documentation, and bug reports, reducing reporting overhead by 25%.

EdTech- United Arab Emirates

January 2021- February 2023

Junior QA Specialist & Developer

- Built and tested multi-platform e-commerce and CRM dashboards, increasing mobile traffic by 25% through optimized UI/UX validation and cross-browser testing.

- Designed and executed detailed test cases for critical user flows (login, checkout, payment gateways), ensuring 99% test coverage for vital modules.
- Integrated Jira with development workflows to automate bug reporting and status updates, reducing issue resolution time by 40%.
- Managed precise data entry, content validation, and verification within CRM dashboards, ensuring high data integrity across production environments.

Latakia University- Latakia, Syria

February 2021-September 2024

Software Engineering Teaching Assistant (TA)

- Commanded and delivered practical lab sessions and course materials for undergraduate software engineering students, focusing on Software Engineering Foundations, SDLC, Advanced Programming, and Information Security.
- Formulated and authored official examination questions, graded technical assignments, and structured comprehensive practical exam benchmarks and testing scenarios.
- Provided continuous academic mentorship, addressing complex programming inquiries and guiding students through Software Projects and system analysis.

Projects

Clinikal (Enterprise Multi-Tenant EHR Platform)

QA & Coordination Lead

- Oversaw the end-to-end quality assurance process and requirement tracking for a highly secure, multi-tenant Electronic Health Records (EHR) workspace.
- Managed testing scenarios for sensitive healthcare workflows, ensuring full alignment with international security standards (HIPAA, ISO 27001) and regional frameworks (ADHICS, NABIDH).

Divpos & Divsuite (Advanced POS & Operations Dashboards)

QA & Functional Verifier

- Executed rigorous functional and integration testing for admin platforms and operations dashboards focused on real-time data visualization and complex business reporting.
- Validated inventory workflows and state management synchronization to guarantee flawless data integrity and zero-defect reporting under high data entry volumes.

Citizenmeds & Qahwah House (Feature-Rich E-Commerce Platforms)

UAT & UI/UX Tester

- Conducted comprehensive User Acceptance Testing (UAT) and interface validation for modern e-commerce storefronts to ensure intuitive user flows and seamless checkout experiences.
- Tested dynamic cart systems, payment gateways, and advanced product filtering mechanics across multiple mobile and desktop devices.

EDUCATION

Latakia University – Syria

January 2020

Bachelor of Software Engineer

- Cumulative Graduation Grade: Distinction (83.78% – Ranked 5th overall in the graduating class)
- Academic Excellence: Ranked 1st in the 3rd Academic Year with an annual GPA of 92% and received the Academic Excellence Shield.
